

LISTEN UP.

WHEN YOU TAKE A PUFF FROM A VAPE PEN, YOU ARE INHALING TRULY VILE CHEMICALS. YOU'D BE SURPRISED WHERE ELSE YOU CAN FIND THESE TOXIC INGREDIENTS.

VAPING SUCKS.
LAY OFF YOUR LUNGS.

ACETONE

That varnish stuff you shellack to wood to make it look shinier? It contains a compound that's found in nail polish, paint thinner and – you guessed it – vape pens.

FORMALDEHYDE

You know that sickly smelly stuff that pukes the frogs you dissect in biology class? It's toxic. It's pungent. It's in vape pens.

DIETHYLENE GLYCOL

That fluorescent green antifreeze stuff you pour into a car engine? It contains diethylene glycol. It's a literal poison to humans. And it's found in vape pens.

PASS ON THE PUFF. LET THE VAPE PEN DIE – FOR GOOD.
